

Apprenticeships in partnership with **T3 Training and Development and Barnsley College**

Industry experts in structural
detailing & BIM

Fast track training solutions
for structural detailing & BIM

T3 Training and Development Apprenticeship

We would like to introduce you to our company T3 Training & Development, who in partnership with Barnsley College are offering a free, intensive fast track development programme to deliver Apprentices into the role of Structural Technicians. We have built upon the experience of our founding companies to deliver an Apprenticeship programme that brings value to your business. The teams behind T3 have decades of experience in Structural Design, Construction, Project Management, Steelwork and Reinforced Concrete Detailing.

You will gain a BTEC in Construction and the Built Environment Level 3 qualification

Learn how to become an accomplished Structural Technician with BIM skills.

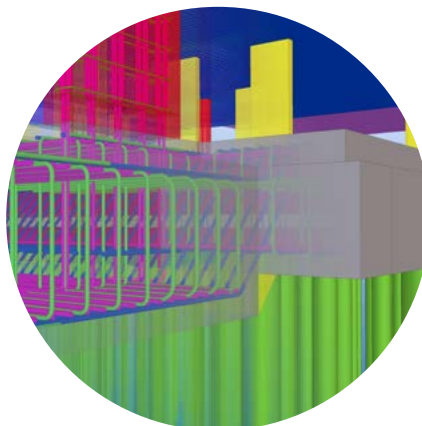

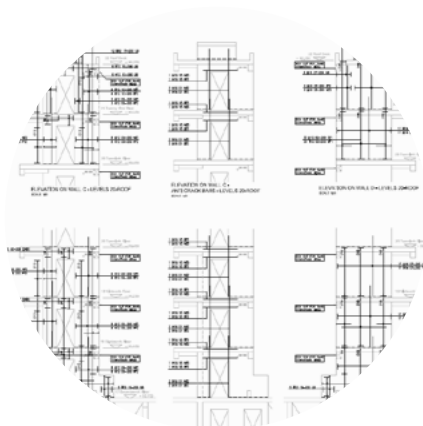

The free and flexible programme starts with 10 weeks of training based at Barnsley College and apprentices will work in your organisation for the remainder of the scheme. It is tailored to benefit the apprentice and employer.

The programme is delivered by an experienced lead structural technician who has worked within the industry, has relevant experience and is a vocational expert. Learners will train in AutoCAD and Revit or Tekla (employer's preference) by a certified Tekla or Autodesk training provider.

What will the course lead to?

The apprentice would have the opportunity to become a junior or trainee technician upon successful completion of the course. There are also opportunities for further study such as HNC, HND or foundation degree courses in construction and engineering, designed to support the role in industry.

It has been shown over 85% of apprentices stay in employment following the completion of their course with over 64% staying on with the same employer and 32% receiving a promotion within a year.

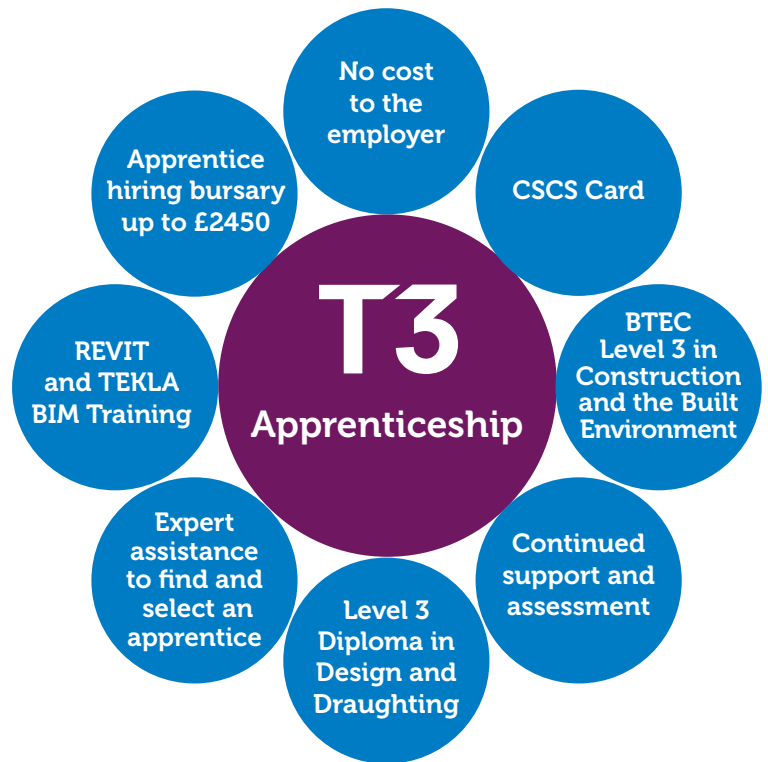

I've been on an Apprenticeship for over a year and personally believe there is no better way of learning. I use a variety of 2D and 3D softwares including Auto CAD, Revit and Tekla. Working alongside professionals and industry experts has enhanced my knowledge and makes the job even more rewarding and enjoyable. As the industry rapidly expands I hope to carry on growing with it as exciting opportunities lay around the corner.

Level 3 Apprentice

T3 Training and Development works in collaboration with T3 UK to address the significant lack of formal training in the construction industry for engineers and technicians. The Apprenticeship is aimed at 16-19 year olds, but is open to anyone who is interested in a career in the industry.

At T3 our mission is to bridge the gap between young talent and experience to deliver an apprentice into your workplace who immediately delivers on your projects. Our training programme is fully funded from the government so there is no training cost to you. Your only financial outlay is the salary of the apprentice.

Aims of the academy

- Address the shortage of skilled employees
- Train a workforce for the future
- Import knowledge to enable efficient use of digital tools

T3 UK provides clients with a specialist structural detailing and BIM service. Utilising the latest software combined with a wealth of technical expertise. T3 are committed to deliver effective design and construction solutions improving efficiencies throughout the design and build process, consistently delivering value to their clients, industry best practice and continuous improvement.

T3 Training and Development works in partnership with Barnsley College to deliver an industry leading training initiative. All training is delivered to the highest standards, whilst ensuring it is cost effective and beneficial for employers to take part in the scheme.

Barnsley College’s aim is to provide all learners with excellent teaching, learning and assessment in state-of-the-art facilities leading to brilliant careers. There is a new Construction Centre and Science, Technology, Engineering and Maths (STEM) Centre, which is equipped with specialist workshops for our students.

Barnsley College Facts

93% of learners progress onto employment or higher level qualifications

Is among the UK's top three most successful apprenticeship providers

Our success rates are 87.9%, well above the national average qualifications

Benefits

- Specialist training in niche area
- Front loaded intensive training
- Hit the ground running
- Minimal employment costs
- BIM skills developed
- Tekla and Autodesk technology used
- Ongoing support and continued vocational training

Features

- CAD (Computer Aided Design)
- Revit and Tekla training
- Reinforcement Detailing
- Skills applied to project-based learning
- Vocational experts teaching
- Industry and educational support
- Ofsted rated outstanding
